HACKATHON 2026

SMARTBED

Real-Time Hospital Bed Availability Tracker

"Know the Bed. Find the Ward. Save the Time."

Made with GAMMA

THE PROBLEM

Finding a hospital bed shouldn't be a guessing game

- 01 Emergency patient arrives
- 02 Reception calls Ward 1: no bed
- 03 Ward 2: no bed
- 04 Ward 3: waiting for confirmation
- 05 Valuable time disappears

Bed availability changes constantly, but visibility is fragmented across wards.

WHY IT MATTERS

Every minute matters during an emergency

The cost of uncertainty is time.

Information is often not centralized

Staff may call multiple wards

Manual communication creates delays

Emergency teams lack simple ward-wise visibility

THE SOLUTION

SMARTBED turns updates into action

One real-time platform connects ward staff, doctors, reception, and emergency teams.

01

**Staff
update**

02

**System
syncs**

03

**Ward
availability
refreshes**

04

**Hospital
dashboard
updates**

05

**Teams find
the right
bed faster**

A five-step workflow from occupied to found

01

Nurse
changes
Occupied to
Available

02

Status
changes
instantly

03

ICU count
moves from 1
available to 2

04

Hospital
totals refresh
automatically

05

Doctor or
reception
finds ICU →
Floor 3 →
Bed ICU-07

ONE PLATFORM

Everything needed in one place

Ward-wise availability

See every ward at a glance

Quick update

Change status in seconds

Emergency mode

Surface critical beds first

Smart bed finder

Search by requirements

Smart alerts

Flag wards nearing capacity

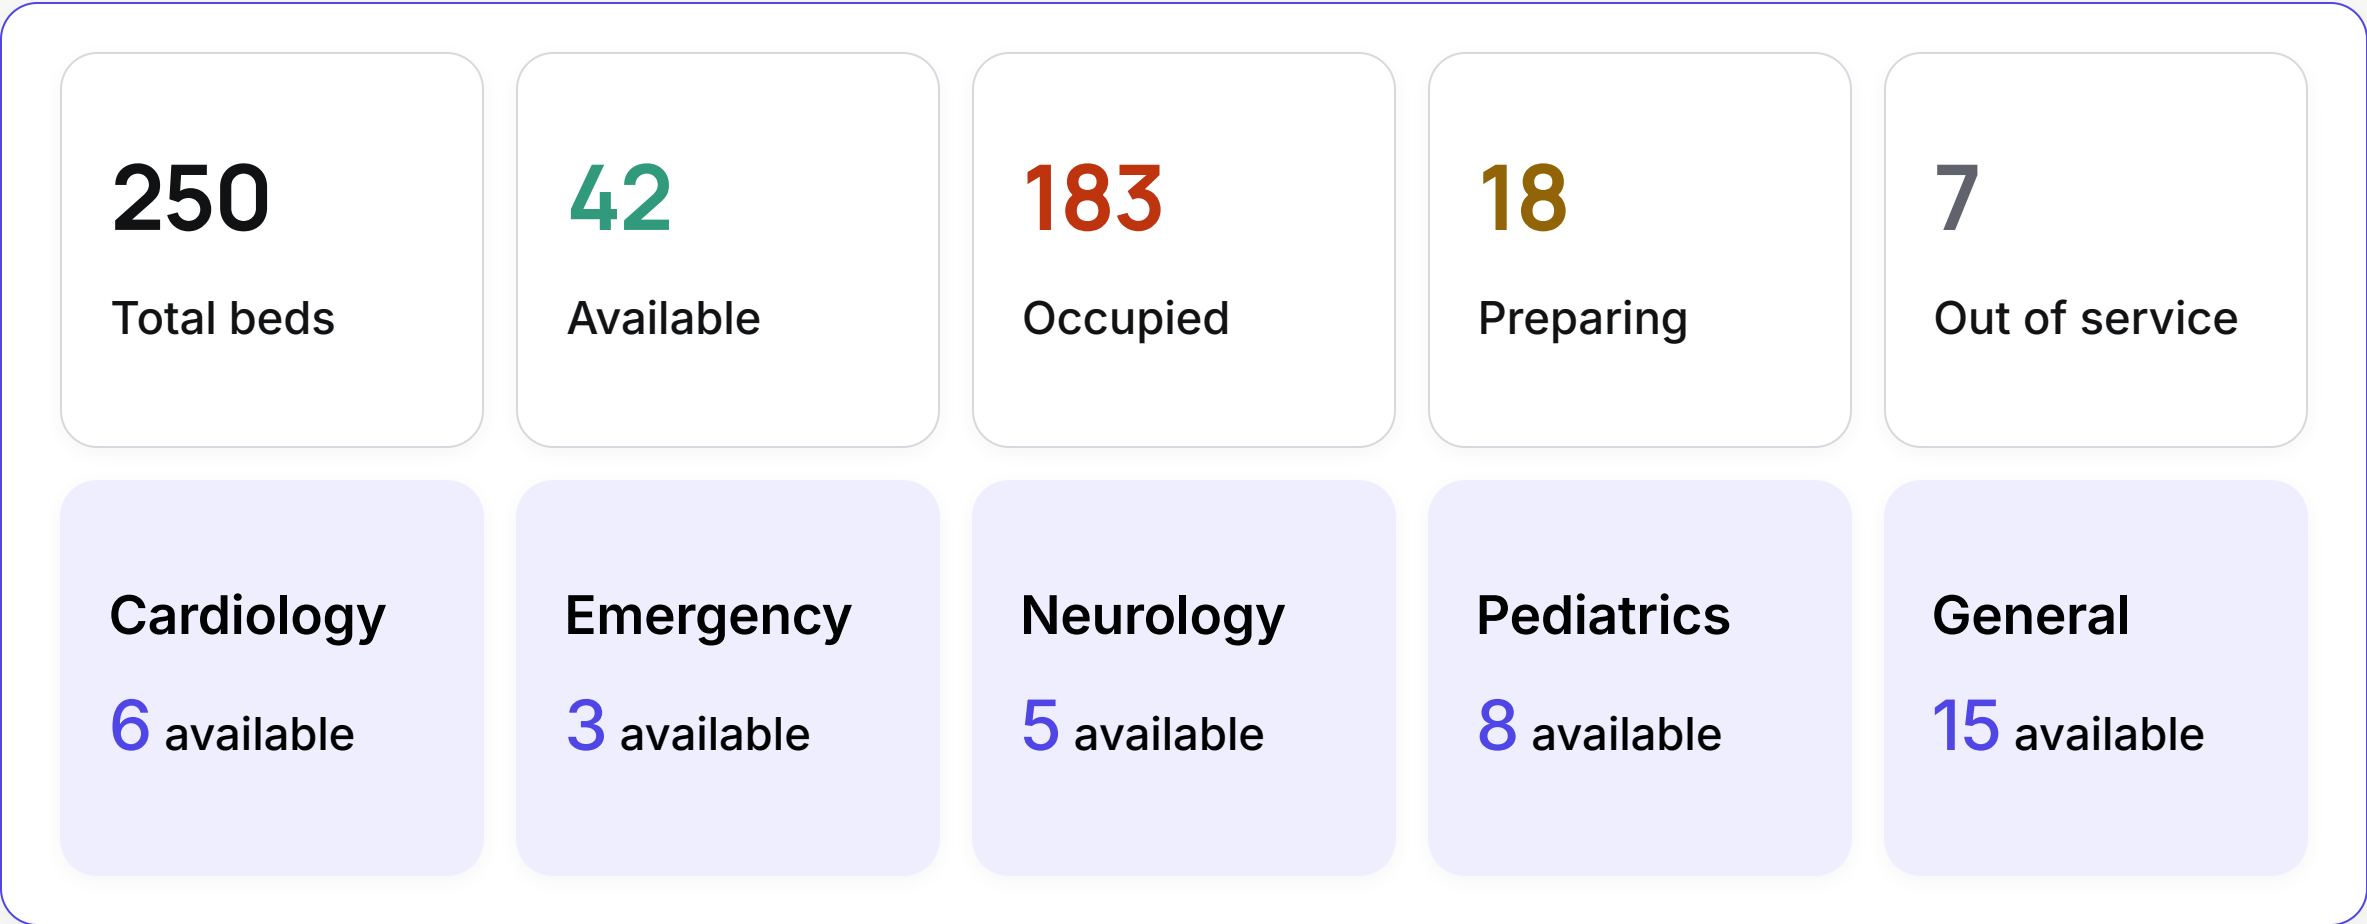

Analytics

Monitor utilization and availability trends

One screen. The entire hospital.

Hospital Bed Command Center ·  LIVE · Updated just now

BUILT FOR THE FLOOR

Designed for real hospital staff

QUICK UPDATE

Cardiology → Bed B03
